- Realistic locomotives, realistic motion, authentic interiors and open cab interiors for passengers.
- Operate a long roster of nearly 40 modern and historical trains in various combinations, including a hand-full of historic locomotives.
- An in-depth tutorial explains how to operate the locomotives and train handling, including engine starting, speed control, emergency procedures, train formation, switch operations, and more.
- Eight progressively more challenging career scenarios that provide challenges to train crews and equipment.
- Gameplay scale adjusted for Steam.
- Driving in Chicago is more challenging than you might expect.
- Train wrecks are real hazards and have potentially serious consequences for both passengers and crew.
- Careful management of fuel levels and daily locomotive maintenance can result in delays and missed orders.
- New Job Transfer... • Now there is a JOB TRANSFER button...if you have been kicked off, you can quickly transfer it back to you.
- New performance tweaks...
- The G37B engine has been given some performance upgrades, it is now at a grand total of 726 HP. This should give you a little more "oomph" in longer trains.
- New/improved in-game graphics...
- CTPN has taken a big step forward in bringing the game to 1920x1080! In actuality we were going for higher, but Steam would refuse to let us. That is not the case now. The graphics are amazing...for a Train Simulator!
- New/improved graphics and sounds...
- We have worked hard to bring better graphics, textures, font and sound to the game. We have had a lot of feedback and we are very happy with the results.
- New/Improved Interiors...
- We have brought in a variety of new

interior grilles and gauges to the game. I think that you will find them to be far superior to the last version. New Locomotives... • We have moved nearly all the locomotives into the game and made a few changes to some for the better. New Career Scenarios... • There are now 4 career scenarios that add depth to the game. New/improved Train Handling... • The handling has been improved in many areas. c9d1549cdd
