How to Upgrade Your LED Lighting Control with MADRIX 3.6k

If you are looking for a powerful and versatile software solution for your LED lighting projects, you might have heard of MADRIX. MADRIX is a professional lighting control software that allows you to create stunning effects and visuals for any LED installation, whether it is 2D or 3D. In this article, we will show you how you can upgrade your LED lighting control with MADRIX 3.6k, the latest and final update for MADRIX 3.

What is MADRIX 3.6k?

MADRIX 3.6k is the last planned software update for MADRIX 3, which was released on December 18, 2019. It is a bugfix release that fixes a critical issue that did not unlock the MADRIX 3 software license for MADRIX PLEXUS hardware interfaces with a serial number higher than 1270 that were connected over Ethernet network.

If you have a MADRIX PLEXUS interface with a serial number higher than 1270 and you want to use it with MADRIX 3 over Ethernet network, you need to download and install MADRIX 3.6k from the official website. Otherwise, you will not be able to use your interface with the software.

Why should you upgrade to MADRIX 3.6k?

Aside from fixing the issue mentioned above, upgrading to MADRIX 3.6k also gives you access to all the features and improvements that were introduced in previous versions of MADRIX 3. Here are some of the highlights:

- MADRIX 3 introduced support for controlling 3D LED matrices, allowing you to create amazing effects and visuals in real-time for any 3D LED project.
- MADRIX 3 increased the number of available storage bins from 120 to a whopping 256 x 256 Storage Places per Storage, giving you more flexibility and creativity for your shows.
- MADRIX 3 added new and improved effects, such as SCE Firework, SCE Metaballs, SCE Starfield, SCE Tunnel, SCE Video Textures, SCE Voxel Mapping, and more.
- MADRIX 3 enhanced the user interface and usability of the software, such as adding a Patch Editor, a Matrix Generator, a Color Filter FX Editor, a Cue List Manager, a BPM Tap Button, and more.
- MADRIX 3 updated the support for various hardware interfaces and protocols, such as Art-Net III / Art-Net IV / sACN / KiNET / DVI / T9 / SPI / DMX512 / MIDI / SMPTE Timecode / Remote HTTP API / OSC / CIP / MA-Net2 / MA-Net / GrandMA2 / GrandMA1 / Avolites Titan One / Enttec USB PRO MK2 / Enttec Open DMX USB / Enttec DMX USB PRO / Eurolite USB-DMX512-PRO MK2 / Nicolaudie Sunlite Suite2 FC+ / Nicolaudie Sunlite Suite2 BC+ / Nicolaudie Sunlite Suite2 EC+ / Nicolaudie Sunlite Suite2 FC+ ESA Pro / Nicolaudie Sunlite Suite2 BC+ ESA Pro / Nicolaudie Sunlite Suite2 EC+ ESA Pro.

How to upgrade to MADRIX 3.6k?

Upgrading to MADRIX 3.6k is easy and free if you already have a valid MADRIX KEY or MADRIX PLEXUS interface with a MADRIX 3 license. All you need to do is follow these steps:

1. Download MADRIX 3.6k from the official website: <https://www.madrix.com/support/download>

2. Run the installer and follow the instructions on the screen.
3. Connect your MADRIX KEY or MADRIX PLEXUS interface to your computer.
4. Launch MADRIX 3.6k and enjoy your upgraded LED lighting control.

Conclusion

MADRIX 3.6
